Full Stack Developer (MERN)

As a frontend-heavy full-stack developer, I bring a strong command of HTML, CSS, and JavaScript and TypeScript, with hands-on experience in frameworks like React and Next.js. Currently navigating through two impactful internships, I've tackled real-world challenges, enhancing my skills in both frontend and backend technologies. Proficient in Node.js and familiar with databases like MongoDB, I thrive creating seamless, user-centric experiences. My project [portfolio](#) reflects a commitment to innovation, from optimising load times to improving overall UI/UX design. I'm not just a coder but a collaborator, having effectively communicated complex technical concepts and worked across teams. Eager to contribute my skills and passion for development to a dynamic environment.

PROFESSIONAL EXPERIENCE

SAFFRON STAYS

FrontEnd Developer Intern

Remote
03/2023-Present
